

Expense Reduction Analysts

Could you turn your waste into revenue and boost your reputation?

One person's trash is another one's treasure

Every year, it is estimated that over half a tonne of waste per workforce participant in Australia goes to landfill - which has become the most expensive destination for business waste. In 2020 the Australian Government introduced the Recycling and Waste Reduction (RWR) Bill to reduce landfill (to 20%) and increase recycling (to 80%) which provides great opportunities for organisations.

Why do you need us?

The RWR Bill steers Australia towards a Circular Economy where organisations can reduce the cost of waste (to them and the planet) and in some cases create income streams from it.

However most do not have the resources nor expertise to navigate through the grants, rebates, carbon credits and challenges such as bin utility, waste vendor management and on/off-site waste sorting and processing.

This means that, without ERA's help, many businesses are not taking advantage of the positive environmental impact, social benefits and significant savings gained by taking action - now.

Taking a Results-driven Approach

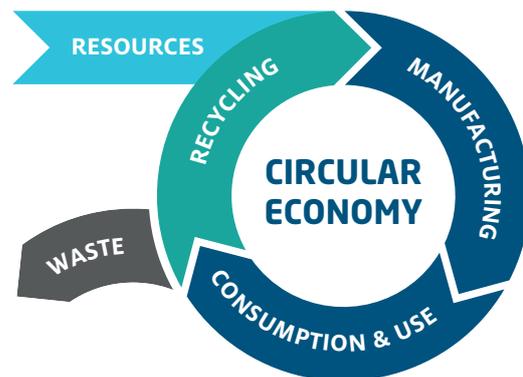

Expense Reduction Analysts (ERA) is one of the largest expense reduction consultancies worldwide.

Our specialists leverage their in depth industry knowledge to ensure you receive the best pricing and services, while your staff stays focused on your organization's highest priorities.

We help organizations implement best practices and find meaningful savings on necessary purchasing costs with no risk as there are no fees if no savings are found.

Benefits of an ERA Review

- 🔄 Reduced costs from poor bin utilisation and practices
- 🔄 Improved waste separation and processing
- 🔄 Revenue from relevant grants, rebates and carbon credits
- 🔄 Reduced environmental impact (eg reduction of CO₂ and CH₄ emissions and leachate into ground waterways)
- 🔄 An ongoing audit of negotiated pricing
- 🔄 Enhanced reputation to customers and staff as a good citizen - "we are doing the right thing."

Questions to consider

Who is profiting from the treasure within your trash: you, your council, or your waste processor?

Are you extracting the maximum value from your waste before you send it to landfill?

Do you have specialized resources to keep abreast of the nationwide initiatives around waste management and the circular economy?

Cartage fees, dumping fees, collection fees, periodical rents: do you know what you are paying per kilo, litre or container?

Are you wanting your customers and staff to be proud of how your brand deals with waste and cares for the environment?

Unlock the Potential

Discover the solutions that are right for you. Contact us to learn how we can help you find additional cash that you might be leaving on the table. Let's work together to help reward your organisation with better waste management.
